

Guide til at forstå farvesignalerne

Har du købt en SpeechMike Premium Air og koblet den til strømforsyning, vil du bemærke, at der både på mikrofonen og på docking-stationen (mikrofonholderen) er to lys:

Et batteri-lys som viser, hvor meget batteri mikrofonen har, samt om den oplader.

Et forbindelses-lys som viser, hvorvidt mikrofonen og docking-stationen har forbindelse til computeren.

Nedenfor er en oversigt over de forskellige farvesignaler, og hvad de betyder. Er du i tvivl om, hvordan de skal fortolkes, kan du kontakte Omilon på 70 10 55 10.

Connection LED

SpeechMike	Docking station	Meaning
		• connection OK
